Center and Department of Medicine

*Human Genetics of Obesity:
Progress and Challenges*

UCSF COAST Mission

To reduce the prevalence and adverse consequences of obesity. This will be accomplished through innovative interdisciplinary research, education, clinical care, and community interventions. These efforts span from biological to socio-cultural and environmental contexts, from children to adults, and from prevention to treatment.

For more information, please contact Vaishali Patel at patelv@chc.ucsf.edu
or 415-476-7283.
